Certification Program and Exam Overview

This Study Guide is designed to help you prepare for the Couchbase Associate Java Developer Certification exam. The 40-question certification exam is based on fundamental aspects of Couchbase 7.0 database, the Couchbase Java SDK 3.2.1, and building a prototype application. The 8 courses of eLearning and 7 Lab exercises provided are the ideal sources for preparation. As with any certification, the most valuable parts are the learning process which leads to successful concept recognition.

We encourage you to take time to go through the free, self-paced eLearning courses of Certification preparation. These materials are designed to walk you through essential topics, Couchbase features and benefits, as well as how Couchbase 7.0 and Java SDK 3.2.1 knowledge can be applied to the creation of an application. However, this is not a required step prior to taking the Certification Exam. As of the upload of this document, the Java SDK reference is 3.2.1; however, due to constant updates, Couchbase cannot guarantee that is the most current SDK at the time a learner takes the course or exam.

Items to understand:
  ⇒ Topics in this Study Guide and aligned to the exam and are organized by subject area, where each topic contains a description of what you should make sure you know.
  ⇒ The list of topics can be used as a check-list.
  ⇒ The eLearning and Lab materials can be used as points of reference and explanation of key concepts covered in the exam.
  ⇒ Each course contains a PDF of resources where you gain further understanding of the key concepts discussed.
  ⇒ Everything in the exam is covered somewhere in the course preparation materials.

Possible Preparation Path:
  ⇒ Review the 8 courses that are 5 to 20 minutes in length. These courses include interactive slides, accompanying narration, knowledge check quizzes.
  ⇒ Make notes of key topics and call outs that align with the Study Guide topics listed.
  ⇒ Work through the lab exercises for practice with key concepts. Use the labs to experiment with anything you need to spend more time on.
  ⇒ Please keep in mind that you are expected to have good working knowledge of all the topics listed. Most of the questions will be very general; however, you will be asked a few advanced questions.
Certification Exam Logistics

When you are ready to test and validate your product knowledge, please visit learn.couchbase.com/store to purchase an industry-recognized CB130J: Couchbase Associate Java Developer Certification Exam.

- Certification exams may be taken from a location of your choosing, anywhere in the world, provided you meet the basic system and test environment requirements. Please read these instructions thoroughly. See here for requirements. Mac users should pay specific attention here as setting changes may be required. All users will need to bring a photo ID to the exam.
- For help with your exam purchase, exam registration process, credentials verification, or other questions related to our certification program, process, and procedures, please visit couchbase.com/academy/certification.
- The exam itself is computer-based and must be purchased from Couchbase and scheduled with the vendor ProctorU in order to take it.
- The proctor will require 5-10 minutes of setup before you begin the exam. You will receive general instructions from the proctor.
- It is IMPORTANT that you do not start the exam until you are told to do so by the proctor. who must type in a password before you begin. Starting the exam without the proctor can invalidate your exam.
- You have up to 60 minutes to answer the 40 multiple choice questions. You must answer at least 32 questions correctly (80%) in order to pass the exam.
- Read each question carefully, and provide the best answer. Questions can be skipped and returned to as you have the ability to review all selected answers before submitting the exam.
- In particular, questions refer to the Couchbase Java SDK version 3.x. No previous version of the Java SDK will be referenced in the exam or associated certification materials.

Certification Exam Pass/Fail Scenarios

If you earn a passing score, you will be granted the Couchbase Certified Associate Java Developer badge which is granted by Acclaim, our badging vendor.

- This badge can be socialized on LinkedIn, Twitter, Facebook, WhatsApp or within your email signature.
- The skills you show with this certification have been validated as appropriate for the Associate-level Java Developer, and have been attested to by many Subject Matter Experts within Couchbase, Inc.
